

# ALUMANATION® 301

Exposed waterproofing and rustproofing, liquid applied, single component coating for refurbishing metal roofs...

Alumanation® 301 is a metallic pigmented coating used for the rustproofing and weatherproofing of metal roofs and sidewalls, and as a reflective coating for BUR and modified bitumen roof systems.

## Features & Benefits

### Fast Installation

No priming is required.

### Bonding

Strong bonding on existing or rusted metal roof.

### Single Layer

Single pass (one layer) coating for fast installation.

### Flexible Application

Roller or spray coating for fast installation.

### Cool Roof Performance

Cool roof performance endorsed by Energy Star.

### Rust & Water

Simultaneous rust and water proofing.

### Detailing

Use compatible detailing materials (Vulkem® 931 and Polyfoil) prior to installing Alumanation® 301 for enhanced performance.
